

BIG BLUE BALING TWINE

Big Blue Round Bale twine is one of the signature Twines of the Donaghys twine range and has been a favorite over many years for general purpose Large Round Baling.

Big Blue encompasses both strength and a long running length per spool, which makes it a great all rounder in the Large Round Bale Twine market.

USAGE AND APPLICATION

Designed for the tough baling environment of Australia, Big Blue's combination of strength and longer running length, makes it an ideal general purpose twine for use in all modern conventional Round balers, baling low to medium density round bales.

Big Blue is designed for both the Contractor and Farmer/End-user for use in crops types such as; Pasture, Cereal, Straw & Silage and will save money through down time re-loading.

FEATURES AND BENEFITS

- Incandescent blue fibre
- Superior UV resistance
- 6000m Length spools - Maximise baler machine runn-
nage
- Less packs twine required per load for more bales
pressed
- Reduces time spent in the field
- Designed for Australian conditions with 12 Month
guarantee against UV degradation.

FAQ'S

- Is Big Blue Round suitable for baling Cereal & Pasture Hay & Silage?

Yes, it is suitable for baling all cereal & Pasture hay's and Silage in all Conventional low to medium density Round Balers.

- Is Big Blue suitable for baling Straw?

Yes, it is suitable for baling straw in all Conventional low to medium density Round Balers.

- Is the colour of the Twine important?

The addition of coloured master batch can change the characteristics of the polymers. However, all colours from the Integrated Packaging Twine range are suitable for baling in Australian conditions. Some colours are preferred by consumers more than others due to visual requirements such as visibility in certain crop types, night baling or end-users requirements.

FAQ'S

- Can I use Big Blue Round baling twine in my Round baler twine system?

Yes, IP's Big Blue large Round is suitable to run in Round balers with Twine systems where a stronger twine is required for higher baling pressure.
