| LARGE ROUND BALERS | TWN0011 | SISAL SILAGE ROUND 2 X 2500M PACK | NATURAL | 40 | 78 | 69 |

USAGE AND APPLICATION

Sisal Silage Round is untreated, non-toxic sisal, and is ideal twine for baled silage due to its quick breakdown properties in the environment. This enables the twine to be left in the paddock with no contamination worries from residue.

Sisal Silage Round is designed for both the Contractor and Farmer/End-user for use in crops types such as; Pasture, Cereal, Straw and Silage.

FEATURES AND BENEFITS

- Natural untreated biodegradable sisal twine
- Untreated, non toxic and quickly breaks down
- 2,500 metres per spool
- IP's most environmentally friendly big round twine
- Recommended for use under silage wrap.

FAQ'S

- Is Sisal Silage Round suitable for baling all Silage crops?
Yes, it is suitable for baling all cereal & Pasture hay's and Silage in all Conventional low to medium density Round Balers.
- Can I wrap round bale Hay with Sisal Silage twine?
It is not a common practice but you can use on Hay, but quick breakdown from sunlight and weathering may not be suitable for Hay conservation.
