

TOP KNOT BALING TWINE

The old 'warhorse' and one of the signature Twines of the Donaghy's range. Top Knot is a specialized twine for Large Square Baling and has been the mainstay of baling both heavy and difficult hay and straw crops over many years and still continues to perform. Top Knot is designed to take the challenge of superior knot holding in the toughest of Large Square Baling conditions.

USAGE AND APPLICATION

Designed for superior strength to maximize bale weight and compression in Large Square Baling, Topknot is a perfect choice for use in all modern conventional Large Square balers, where baling conditions are reaching the maximum in Conventional Large Square Baling.

The use of Top Knot Twine is applicable across all Hay, Straw and Silage crop types.

FEATURES AND BENEFITS

- Titanium strength characteristics
- Superior Knot holding
- Smooth run through baler, reducing wear on Knotter equipment
- Designed for Australian conditions with 12 Month guarantee against UV degradation
- Average Runnage of 117m/kg

FAQ'S

- Is Top Knot Big Square suitable for baling Cereal & Pasture Hay & Silage?

Yes, it is suitable for baling all cereal & Pasture hay's and Silage in all Conventional Large Square Balers.

- Is Top Knot Big Square suitable for baling Straw?

Yes, it is suitable for baling straw in all Conventional Large Square Balers.

- Will I have to adjust my knotter's in the baler if I change my twine?

There may be a need to adjust the knotter settings if using different thickness of twine.

- Is the colour of the Twine important?

The addition of coloured master batch can change the characteristics of the polymers. However, all colours from the Integrated Packaging Twine range are suitable for baling in Australian conditions. Some colours are preferred by consumers more than others due to visual requirements

FAQ'S

such as visibility in certain crop types, night baling or end-users requirements.

- Do I need to run a higher strength twine on the outside Knotters of my Baler?

This is an option to reduce the need for higher strength twine across the whole Knotters, but can depend on crop type and conditions of crop being baled.

- Are the thicker, stronger Twines more abrasive on my knotter mechanism?

Twines that are thicker are often harsher and cause wear on both twine guides & Knotter parts.

- Is Top Knot suitable for Large Square High Density Balers?

Top Knot has been designed for baling in standard LSB balers. IP have other high performance twines available for High Density baling.
