# PACKAGING PEACE OF MIND

Integrated Packaging Group - a part of ASX listed Pro- Pac Packaging Group (PPG), is one of Australia's largest manufacturers of flexible packaging products for a diverse range of customers. With over 39 years of experience in the food, beverage, industrial, fresh produce and FMCG sectors, IPG has a well-established, leading position in the flexible packaging industry.

We're confident our diverse range of packaging solutions and technical experts fulfil customers' industrial packaging requirements. From available off-the-shelf products to customised solutions, we're able to find, test and create what our clients need.

When it comes to finding a local partner for your next project, choosing Integrated will unlock a world of expertise, knowledge and experience and we will provide a packaging solution to meet your requirements.

A detailed view of industrial machinery, likely a flexographic printing press, with various rollers, gears, and structural components. The machinery is metallic and complex, with some parts labeled 'CENTRO AC'.

# WE PROMOTE A SUSTAINABLE FUTURE

We understand that consumers are more frequently insisting that products — and the packaging that protects them — come from a company they trust and is environmentally responsible. Integrated Packaging has taken bold actions to advance our sustainability initiatives, including meeting ambitious goals to reduce greenhouse gas emissions, decrease our dependence on fossil fuel-based energy and responsibly utilise water.

The Integrated Packaging Group closes the sustainability loop with Integrated Recycling turning waste film and plastics that have served their primary purpose into an innovative second life range of products. The product range includes outdoor furniture, board walks, retaining walls, fencing and specialty structural products.

Focused on innovation, sustainability and a commitment to social and ethical responsibility, the measures in place to reduce our environmental impact include:

- No raw material waste to landfill
- In-line capture of trim, recycled into alternate products
- On-site resin reclaim
- Heavily Printed waste recycled externally
- Energy use optimised via installed capacitor capability
- Development of degradable and compostable solutions
- Partnered with REDcycle
- Member of Plastics and Chemicals Industries Association
- Signatory to the Australian Packaging Covenant
- Sedex member (supplier ethical data exchange)

## Accessories

High-quality packaging is just the beginning – a complete solution often requires the necessary accessories. We supply all of the extras you need to make any wrapping job easier, safer and more effective.

## Blown Stretch Film

Blown film performs better with holding and protecting heavier loads and offers high puncture resistance. Our blown films are manufactured to achieve strong and safe pallet unitisation and are available in our Ipex and Jackwrap brands.

## Bundle Shrink

Advanced technology and the highest quality resins combine to provide premium grade shrink film. Tighter packs with improved load holding ensure your products reach the shelf in the best condition.

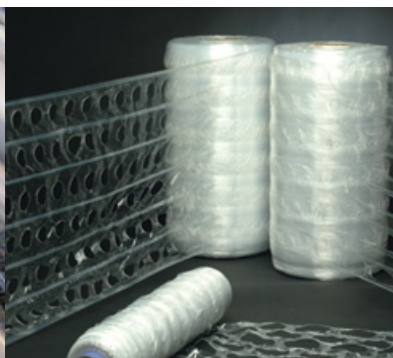

## Bundle Tape

Pre-stretched, blown manufactured bundle wrap is ideal for tying, binding or bundling irregular shaped items, such as timber, metal or pipes. Same great benefits as Ex-Cell pre-stretched hand film. Lightweight, easy to use and strong.

## Cast Stretch Film

Cast film is excellent for many wrapping applications. Its strength, stretch properties and quiet operation make the film an ideal product for various machine wrapping applications.

## Pallet Netting

Ideal for palletising products that need ventilation, our pallet netting allows quicker cooling and drying of your palletised goods. Easy to apply and available in pre-stretched hand and conventional, and pre-stretched machine wrap.

## Pallet Shrink

Our pallet bags and pallet shrink film are ideal for securing heavy pallets via heat shrinking and for protecting pallet loads from dust and moisture during storage or transit.

## Plain Films

Integrated Packaging has a broad range of film extrusion capabilities, that utilise the latest polyethylene extrusion equipment across our sites.

## Pre-stretch Film

Stretched under controlled conditions, this LDPE film has proven to produce better results with improved load stability and efficiency. It uses less film, producing less waste saving costs and the environment.

## Printed & Plain Bags

Our printed films include an extensive range of high-quality polyethylene bags products. Our range of plain bags is extensive from small converted bags to very large pallet bags and liners; converted in line on our film extruders.

## Printed Films

Our expertise and large scale flexographic printing capabilities allow us to provide new and innovative point of sale packaging solutions customisable for all applications. We will handle all your design, pre-press and printing needs.

## PVC Films

We are dedicated to producing quality PVC Films. We are the leading supplier to markets in Australia and overseas and our quality Australian Made film has an outstanding reputation for reliability and performance.

## Stretch Hoods

Integrated Packaging's stretch-hood wrapping combines the best elements of shrink wrapping and stretch wrapping, along with low wrapping costs per pallet, optimum stability and excellent protection.

## Top Sheets

Acting as moisture and dust barriers for the top or bottom of the pallet, our top sheets provide secure protection from the elements. Available in Various sizes to suit multiple pallet configurations, and in Clear or black plastic.

## Wrap Machines

From semi-automatic machines to fully-automated lines and individual projects, HMPS and Integrated Machinery bring you effective stretch-wrapping solutions. We're also proud agents for the Lantech range of stretch wrapping equipment from the United States.

# TECHNICAL EXPERTS WE ARE HERE FOR YOU

Our approach focuses on delivering a more customer centric experience. We go the extra mile to provide an experienced and dedicated team in every state, major city, and region in Australia and New Zealand.

The availability and easy access to Integrated Packaging's expertise, combined with our extensive local stock holding and sound processes, are empowering factors which will give customers access to a holistic approach across their packaging requirements, for complete packaging peace of mind.

Our category management focus provides our customers a specialised service, improved quality, greater savings, and an increased focus on collaboration and innovation. We have further improved our operations with integrated systems which offers greater visibility and responsiveness to customers.

“

*A consistently high level of support and customer service*

”

*Integrated Packaging provide excellent customer service, consistently exceed DIFOT and quality targets and have strong technical support available to support our brewery network.*

*Lion is committed to improving the sustainability of our packaging, in 2019 Integrated Packaging partnered with Lion to downgauge our shrink film, removing over 40 tonnes of plastic from our supply chain. The commitment shown from Integrated Packaging in the delivery of this project demonstrates the strong partnership that exists between our organisations*
