

BOPP Film

BOPP (Biaxially Orientated Polypropylene) Film is high clarity food contact safe and a popular choice due to its extreme versatility and durability. Its combination of practical applications delivers a wide range of performance solutions. With less shrinkage, better stiffness, transparency, sealability, and barrier properties, it is a tough task for other films to match up.

BOPP Film is ideal for:

- produce
- snack foods/baked goods
- spices/nuts/confectionary
- frozen food & ice creams
- leafy salads
- pharmaceutical and medical

BOPP films are designed to run on high speed overwrappers or flow wrap machines. BOPP films have superior gloss and clarity, ideal for quality product presentation. Our films are available in thickness range 20-35 microns. Available in plain, heat-sealable, metallised, matte, anti fog, cavitated, coated and barrier, and other speciality grades.

Features & Benefits

- high clarity and uv resistant
- food grade
- extremely durable & versatile
- recyclable
- keeps product dry
- suitable for hot & cold products
